Graduating May 2011

Atlanta, Georgia

Summer 2007

Shanghai, China

Summer 2008

Beijing, China

Summer 2010

Oxford, England

Research and Leadership Experiences

Undergraduate Research

Worked with Dr. Suresh Menon at Georgia Institute of Technology's Computational Combustion Laboratory. Modeled complex dynamics in turbulent flow using data supplied and processed by supercomputers.

Spring 2007

Chaotic World server for the PC game Neverwinter Nights

Lead senior developer and system administrator for a persistent world server with over 5,000 registered users and with about 120 players actively logged on during peak hours.

2007 - 2009

DotA Commentating Community for the PC game WarCraft III

Co-founder of dotacommentaries.com and helped develop its player community. Online collaboration and project management with other commentators and staff. Website and Teamspeak server administrator. Approximately 40,000 unique visitors per month.

2009 - Current

Senior Design Project - Chief Engineer / Deputy Program Manager

Group design of a complete flight vehicle given a mission statement and specifications, such as a Single-Place, Twin-Jet, Close Air Support (CAS) Fighter. The Chief Engineer / Deputy Program Manager conducts program reviews with the team and monitors engineering process, rearranges power to cure project shortfalls, assures the execution of the schedule, and is responsible for the successful completion of the project.

Fall 2010 - Current

Work Experiences

Nippon Telegraph & Telephone Corp.

Full-time internship: Created web applications that utilized 3rd party API for service linkage system that reflects session information between users. Used AJAX (PHP, JavaScript, and SQL) to communicate and exchange real-time information between the client, API service, database, and the web server to maintain synchronized sessions between multiple clients.

Summer - Fall 2009

Tokyo, Japan

The final project used Google Maps API to allow multiple clients to view a synchronized map, which continuously updates to respond to a client's modification, such as coordinates, zoom level, and even Street View camera orientation,. The application had a permission and privacy setting and required no additional web plugin to run.

Awards and Scholarships

Dean's List

HOPE Scholarship

John Staton Scholarship

Computer and Language Skills

Proficient in Windows OSs, Mac OS X, and Linux OSs.

Proficient with many major applications such as Microsoft Office, Adobe Creative Suite, and Final Cut Studio.

Proficient with MATLAB, AutoCAD, and Solid Edge.

Proficient in Java, C++, Python, SQL, HTML, XML, JavaScript, CSS, PHP, and AJAX.

Language level: advance Chinese, advance Japanese, and intermediate German.
