

Satoshi Kawasaki

Work Experiences

CA Technologies – Associate Services Consultant

- Enrolled in the 6-month Associate Services Consultant Program (ASCP) on the Virtualization and Service Automation (VSA) track.
 - The ASCP is a readiness and learning development program to help new hires become a successful consultant by developing both technical and soft skills.
- Began to specialize in the cloud software, CA AppLogic, and moved under the Cloud Incubation Team. Worked closely with the AppLogic global SWAT and Sales team to learn and practice specific skill sets such as Linux, networking, scripting, and consulting.
- Traveled to client sites to help implement solutions, deliver knowledge transfer, and use opportunities to help drive new sales.

July 2011 - January 2013
Atlanta, Georgia

Neadwerx, inc. – Software Engineer Intern

- Worked in a small team to write a SaaS application for Home Depot Innovation Center's (IC) reservation request system to replace the system on Intuit's QuickBase.
 - Wrote mostly middleware code in JavaScript and PHP. Coordinated with a front-end developer to properly label and format the HTML for CSS styling. Modified and redesigned part of the back-end database based on new client requirements.
 - Created features including reservation request and approval management, storage space filtering, and freight information.

May - July 2011
Atlanta, Georgia

Nippon Telegraph & Telephone Corp. – Software Engineer Intern

- Worked in NTT Musashino Research and Development Center and created web service applications using AJAX for shared sessions among multiple clients.
- Wrote SaaS web application connected to a MySQL database (back-end) using HTML, JavaScript, and CSS (front-end), and PHP, AJAX, and XML / JSON (middleware).
- Created a collaborative map view application using Google Maps API.
 - Synchronized coordinates, addresses, driving directions, and Street View data among multiple clients in a secured session.
 - Created a permission and privacy feature in a presenters/attendees format.

May - November 2009
Tokyo, Japan

Education

Georgia Institute of Technology

Bachelor of Science in Aerospace Engineering

Graduated May 2011
Atlanta, Georgia

Computer and Language Skills

Programming:

- **SaaS:** Django, AJAX, SQL (PL/SQL), PHP, HTML, CSS, XML/JSON, and JavaScript/jQuery.
- **Other:** Python, Java, and C++.
- Usually program in Vim either locally or over SSH using Terminal on Mac OS X.
- Debug using Firebug, FirePHP, and native error messages/logs.
- Git, Subversion, or Mercurial for revision control.

System:

- **OS:** Windows OSs, Mac OS X, and Linux OSs.
- Linux command lines and shell scripts.
- Windows and Linux system/server administration.
- **Database:** PostgreSQL, MySQL, and MS SQL. Familiarity in both CLI and GUI. Basic database administration and security.

CA Technologies:

- CA AppLogic r3 Professional and Administrator certifications.

Infrastructure:

- Cloud computing and virtualization: SaaS, PaaS, IaaS, DaaS (VPDC).
- Platforms (compiling, installing, and configuring): LAMP stack, Django, Apache, and Nginx web server.
- Network and system security and basic networking administration.

Software:

- Major application suites such as MS Office, Adobe Creative Suite, and Final Cut Studio.

Language:

- Advanced Chinese, advanced Japanese, and intermediate German.
