

Satoshi Kawasaki

Work Experiences

Splunk – Professional Services Consultant

- Consulted in a diverse set of engagements from security (Splunk App for Enterprise Security) to IT to internet of things for dozens of clients in the Fortune 100 all over America.
- Helped customers in various Splunk engagements such as onboarding security logs, server infrastructure architecture, access controls, and correlation searches to detect possible security incidents.
- Splunk speaker for .conf 2014 and 2015 (Splunk's annual conference) for advanced visualizations and dashboards.

August 2013 – now
San Francisco, California

Neadwerx, inc. – Software Engineer

- Worked in a small team to write a customized SaaS application for Home Depot Innovation Center's (IC) reservation request system to replace a legacy software.
 - Wrote mostly middleware code in JavaScript and PHP. Coordinated with a front-end developer to properly label and format the HTML for CSS styling. Modified and redesigned part of the back-end database based on new client requirements.
 - Developed code with software security in mind to prevent attacks such as cross-site scripting and SQL injections.

April 2013 – August 2013
Atlanta, Georgia

CA Technologies – Associate Services Consultant

- Enrolled in the 6-month Associate Services Consultant Program (ASCP) on the Virtualization and Service Automation (VSA) track.
 - The ASCP is a readiness and learning development program to help new hires become a successful consultant by developing both technical and soft skills.
- Worked with CA's Identity Manager, which deals with enterprise identity and access management.

January 2011 – March 2013
Atlanta, Georgia

Education

Georgia Institute of Technology

Bachelor of Science in Aerospace Engineering

Graduated December 2010
Atlanta, Georgia
